## SUMMARY OF FATAL ACCIDENTS

1956

Mr. Constant Lambin, age 47, married, no dependent children, died at St. John's Hospital on January 5, 1956, from injuries received from a roof fall at Peabody Coal Co. No. 10 mine, Pawnee, Christian County, Illinois. The accident had occurred on November 30, 1955.

The deceased and his helper, Stephen Trojack, were cutting Room 16 off of a buggy entry, 2 west main south. The accident occurred at about 2:50 P. M., shortly after they had sumped the machine.

Mr. Trojack stated that after making a test for methane he sounded the left side of the place and found it safe to cut. The deceased sounded the right side of the place and said it sounded drummy to him but he believed it was safe to cut. They pulled the machine into the place and sumped the machine. They had cut about five feet when the top coal suddenly fell without warning, catching the deceased under it.

A hidden slip ran diagonally across the place from the left to the right, and the fall followed this slip.

---

Mr. Sherman R. Horn, age 54, married, one dependent child, was killed at the Bell & Zoller Coal Co. Buckhorn Mine, Johnston City, Williamson County, Illinois, by a roof fall which occurred about 6:10 P. M., January 16, 1956.

This accident occurred in the second cross-cut block of coal between rooms 11 and 12, 6 southwest.

This is a Joy Continuous Miner section, extracting pillars almost full recovery. This pillar had been split, driven 15 ft. wide through near the center. However, in order to shorten the belt line, it was necessary to extract a pillar farther inby. Therefor, the machine was moved from this pillar to the pillar inby. Four days later, the machine was returned to the first or partly extracted pillar. The first shift crew moved the machine at the end of the work day.

The second shift crew began operation and had made two runs and loaded 7 buggies of coal from the inby end of the left side of the pillar. Due to a hidden slip, several tons of rock fell without warning, completely covering the loading machine, fatally injuring the machine helper, Mr. Sherman Horn, and slightly injuring the operator.

Slip lines extended along both ribs and partly across the face the entire length of the machine. The average rock thickness was approximately 3 ft. 6 in. Six props had been set on the right side near the loading machine.

Mr. Ray G. Decker, age 48, married, no dependent children, was killed at The United Electric Coal Company's Fidelity Mine No. 11 in Perry County, at 1:00 P. M. on January 20, 1956.

Employed as an electrician, Mr. Decker had been driving a Fordson tractor at the time. He had gone to pull the power off of the cable to the A 311 Wheel. He was returning down a small grade which was wet and slick. The tractor turned sharply to the left and overturned, pinning Decker under the tractor. This accident happened on top of the High Wall, 250 ft. from the power station and 200 ft. from the edge of the High Wall.

Mr. Ralph Cardoni, age 61, married, no dependent children, came to his death at Peabody Coal Co. Mine No. 10 at Pawnee, Christian County, at 2:20 P. M. on January 23, 1956. He was employed as a timberman.

The Mine Examiner, on the morning of January 23, 1956, had reported a fall of about 1½ shuttle cars at room 2 on the "A" buggy entry, 9 north, 2 west, main south. This entry is timbered with 14 ft. iron rail bars, a leg under each end. When an intersection with a room or cross cut is reached, a 14 ft. iron bar is set across the mouth of the intersection, and two 18 ft. iron bars are set diagonally across the entry, forming a "V". In case the roof is bad, lagging is placed across the bars. At room 2, where the accident occurred, 10 ft. wood bars had been used as lagging. The bars on the entry between room 3 and room 2 were set on 4½ ft. to 6 ft. centers, and the same between rooms 1 and 2. Room 2 had 5 cross bars set in it, and the cross cut between "A" buggy and "A" entry had 6 bars in it.

The foreman decided to center leg the cross bars from room 3 up to the fall at room 2 and then proceed to timber the fall. They had set 4 props along the entry under the cross bars, and 1 leg under the cross bar at the mouth of room 2. Mr. Cardoni had dug a hole and had placed a mud sill in it. When the other two men handed him the 6th leg, he said it was too long, and started to dig the hole deeper. The two saw the roof start to dribble or work, and ran toward room 3. After stopping, they noticed Mr. Cardoni was not with them. Returning, they found Mr. Cardoni lying with his head over the rail bar, fastened by a large nigger head or kettle bottom.

---

Mr. Battista Genta, age 64, married, no dependent children, came to his death on January 23, 1956, at 11:40 A. M., at the Little Dog Coal Co. mine located at Gillespie, Macoupin County, Illinois, where he was employed as a cutting machine operator.

The deceased, Mr. Battista Genta, and his buddy had just finished cutting a room when Mr. Genta reached over the control lever to release the tail rope on a short-wall cutting machine. A piece of coal weighing about 100 lbs. fell from the face, hitting him on top of the

head and jamming the control lever about 3 inches into his right eye socket. He died almost instantly.

---

Mr. Frank Baudino, age 47, married, no dependent children, was killed at the Freeman Coal Mining Corp., Orient No. 3 mine, Waltonville, Jefferson County, February 10, 1956. He was employed as an electrician foreman.

The deceased, Frank Baudino, was crushed to death by being rolled between an empty car and a concrete pier in the first 45° west of the surge bin. The deceased and an electrician, Mr. Orville Fairbanks, were standing on the inside of the turn in the 45°, discussing and drawing diagrams of how a telephone circuit was to be changed. They drew the diagram in the rockdust on the pier. Apparently, they were so engrossed in the discussion that they did not see or hear the trip until it was within 60 feet or 70 feet of them. Mr. Fairbanks jumped across the track from the trip, but the deceased did not move, so was caught between the car and the concrete pier and was rolled 7 feet.

---

Mr. Lacy Brown, age 43, married, 3 dependent children, came to his death on February 22, 1956, at Old Ben Corp. No. 22, Valier, Franklin County, Illinois, where he was employed as a shuttle car operator.

At approximately 11:15 A. M., the loading machine in 21 and 22 S. M. E. had finished loading in 22 S. and was moving over to 21 S. The deceased, Lacy Brown, had pulled the last buggy of coal from the machine before the machine was moved. When the machine went through the door between entries, the face boss was at the door and closed the door. He heard the deceased call for help. He ran to where Brown was and saw he was caught between the buggy and rib. He called for the other men on the entry for help. They set a jack and pushed the buggy away from the rib, and lifted the deceased out. They saw he was badly hurt, gave him what first aid they could, and then put him on a motor where he was taken to the bottom. He died enroute to the hospital in Benton.

No one saw the accident. The entry was 13.5 feet wide, was clean and free from anything that would cause unsafe operation of the buggy. The buggy was checked and found to be in good working condition. It is assumed from evidence that the buggy cable was anchored to a door hinge placed loosely in an airdox drill hole near the loader head. The deceased started to follow the loading machine with his buggy to the place where they were going to load. The door hinge that the cable was anchored to, must have come out. The deceased apparently stood up and turned around to see what had happened. As he did so, the buggy must have swerved toward the rib, catching him between the

fender of the buggy and the rib, causing injuries that led to his death soon after.

---

Mr. Hillis Benard, age 55, married, 6 dependent children, died in Marion Memorial Hospital at 2:30 P. M. on February 25, 1956, from injuries received from a roof fall at the New Black Crystal Coal Company mine, Crab Orchard, Williamson County, Illinois, on January 14, 1956. He was employed as a tracklayer.

On the morning of January 14, 1956, Hillis Benard, the deceased, accompanied by two other employees, went in to the 3 and 4 N. M. E. abandoned territory to recover a trap door to be used in another part of the mine. They knocked the posts from under the door header, the header being 2" x 6" x 12'. One of the men accompanying the deceased, picked up one end of the header. The deceased went in by side of the door to pick up the other end. A piece of rock 83" long, 5" thick, an average of 24" wide, fell on the deceased, crushing him and causing injuries from which he died in Marion Memorial Hospital at 2:30 P. M. February 25, 1956.

---

Mr. Charles E. Neuf, age 51, married, no dependent children, came to his death at Freeman Coal Mining Corp. Orient No. 3 mine, Waltonville, Jefferson County, Illinois, at 3:50 A. M. on February 28, 1956. He was employed as a belt maintenance man.

The deceased was working in a crew of men that were moving a roll of 36" belt to 29th S., M. W., to extend that belt line. The roll of belt was 48" in diameter and weighed approximately 2,800 lbs. They had moved it on a low truck to the end of the track in 2nd W. and were going to roll it down the entry to 29th S. This is down grade approximately 10° at the place of accident. The roll of belt started to roll toward the rib, and the deceased tried to slough it around straight. His glove caught on a nail that was driven in the belt, and he was pulled over the top of the belt. It ran over him, crushing his skull.

---

Mr. David Jenkins, age 55, married, no dependent children, died of injuries received April 28, 1956, at 9:20 A. M. at the Moffat Coal Co., Murdock Mine, Murdock, Douglas County, Illinois, at 9:25 P. M. April 29, 1956. He was employed as a motorman.

The deceased, Mr. David Jenkins, was taking 14 loaded cars out. His buddy said that when he started over the grade on the east haulage road, they saw some lost loads on the track about 200 feet ahead. Mr. Jenkins tried to stop the trip but was unable to do so. When they got close to the lost loads, the trip rider jumped and was immediately followed by Mr. Jenkins. In some manner Mr. Jenkins was caught under the wheels of his trip, causing injuries which resulted in his

death. There were from 3 to 5 feet of clearance on each side of the track. There seems to be a tendency for the "he and she" hitching to pull loose at this point.

---

Mr. Benjamin Rak, age 64, married, no dependent children, came to his death at 5:50 P. M. on May 11, 1956, at the Bell and Zoller Coal Company #3 mine, Zeigler, Williamson County, Illinois, where he was employed as a Joy Loading Machine helper.

This accident happened in the cross-cut of room 26, 1 W. 15 N. 4 W. N. This was the 3rd cut in the cross-cut and it was 12 ft. 7 in. wide. After three shuttle cars of coal were loaded out, the roof bolts were ten feet from the face. Loading was stopped when the roof started to chip in by the roof bolts. Some rock was pulled down and then the foreman ordered the men out of the cross-cut to the face of the room. The Joy was backed out of the cross-cut. The foreman walked out but the Joy helper stood under the 2nd roof bolt from the face, with his back to the face of the cross-cut and with a pick in his hand. A slab of rock 7 ft. 9 in. long, 5 ft. 7 in. wide and 8½ inches in thickness at the roof bolts to a feather edge at the face, fell. The end of this rock near the face fell first, the end at the roof bolts falling last. That caused the rock to be thrown under the roof bolts, striking the deceased, Mr. Benjamin Rak, on the hips. The blow pushed into his stomach the handle of the pick he was holding. The rock had the legs of the deceased covered from the knees down.

---

Mr. Cleve Ewing, age 43, married, 2 dependent children, was killed by a rock fall at the Bell and Zoller Coal Company's Buckhorn Mine at 7:30 P. M. on June 13, 1956, at Johnston City, Williamson County, Illinois.

The deceased was a shuttle car operator. Due to the illness of a shuttle car operator on another section of the mine, the deceased was being transferred to that section by a main line motor with a trip of empty cars.

He was riding in a seat on the front end of the motor, the opposite end from the motorman. They had traveled from the mouth of the 14 south to a point near the old 5 west. Immediately after passing through a swag, they observed a small fall on the track 30 to 40 feet ahead. Since the motorman was unable to stop the motor in this distance, the motor ran into the fall. More rock fell, almost covering the motor. The deceased was partially covered by rock and crushed against the motor.

---

At 12:30 P. M. on Thursday, August 16, 1956, Herbert George, age 35, a shooter, was fatally injured by a fall of top coal and shale in the Bradbury Mine, Midwest Utilities Coal Corp., in Randolph County. He died in the Sparta Hospital, Sparta, Illinois, at 4:30 P. M. the same

day. Mr. George had 10 years of mining experience, the last ten months as a shooter in this mine. He is survived by his widow and four dependent children.

At approximately 12:30 P. M., Mr. Herbert George, the victim, and Mr. William Glenn, moved the shooting equipment into No. 6 room 3 panel south off the 3 south main east. Glenn had started squirting water into the drill holes to allay the dust, and George was putting a shear strip into one of the blasting shells. Without warning, the overhanging top coal and some shale fell, covering George. The top coal and shale that fell was approximately 6 feet wide, 7 feet long, and 6 inches thick, and was triangular in shape. The roof bolts were as close to the face as it was possible to install them, with the exception of a bolt through the piece of overhanging top coal. Mr. Albert Simms, face foreman, had examined the place at 11:45 A. M., observed the overhanging top coal and stated that it was solid and that he considered the place to be safe.

---

Jerry Lynch, employed as a utility man on the second shift bullgang at the Sahara Coal Company's No. 5 Mine at Harrisburg, Saline County, was killed instantly about 9:30 P.M., Thursday, August 30, 1956. He slipped from the rear of the locomotive on which he was riding, and was crushed under the first car of the trip being pulled. Lynch was 54 years of age and had more than 30 years of mining experience, 17 of which were at this mine on the bullgang. He is survived by his widow and four dependent children.

Edgar Legai, motorman, and Lynch, the victim, were members of a utility, or bullgang, group of men. In addition to laying pipe and hanging wire, they also delivered supplies and brought defective or unused mine equipment out at or near quitting time. Their duties for most of the shift that night consisted of wire and pipe work. On the way out of the mine, as was their custom, they coupled on to two cars containing unused drill carts. The first car, or the one near the locomotive, was marked "bad order" or defective. Lynch inspected the car but found no visible defect. He then mounted the seat on the rear of the locomotive opposite the trolley wire, and Legai, the motorman, brought the two-car trip to the scene of the accident without any trouble. As they crossed the frog slowly on the 4 southeast entry and entered the supply track, both men watched the cars.

Lynch gave a go-ahead signal with his lamp, then put his hand up to his chest or jacket, moaned, "Oh, my . . ." (or something similar), and fell off of the locomotive in front of the trip. Legai stopped the trip as soon as possible. He went back to help his buddy, but found Lynch crushed to death under that part of the mine car that protrudes beyond the rail. He immediately ran for help and found Goldman, night mine manager, near the slope bottom. He, with others, assisted in releasing Lynch from under the mine car. Mr. Lynch apparently

was killed instantly. Mr. Legai said that Lynch did not strike the roof or wire, and that he also appeared to be in good health while they were working in the section.

Obie Prince, employed as a cutting-machine operator, was injured severely in the Eddy Mine, Eddy Coal Company, in Fancy Prairie Township, Sangamon County, about 8:00 P. M. Wednesday, September 5, 1956. He died at about 9:00 A. M. Friday, September 21, 1956. The accident occurred while Prince was preparing to unload a shortwall cutting machine from a Caterpillar Truck prior to undercutting the face of the 6 west entry off 19 north. The victim was 46 years old and is survived by his widow and 4 dependent children. He had 25 years of mining experience, the last 3 years as a mining-machine operator in this mine.

Obie Prince, the cutting-machine operator, trammed the machine from the face of 5 west entry off 10 north to the face of 6 west entry off 19 north, where he was to undercut the face. Apparently, when Prince attempted either to stop or to maneuver the truck, the control for only one track broke contact, and the other Caterpillar track continued to run. This turned the cutter bar of the machine toward the left corner of the entry and the right rear end of the machine against the right rib, and caught Prince between the machine and rib. Harold Wolfe, cutting-machine helper, was in the 19 north entry watching the trailing cable. He heard Prince call out: "Get me loose".

He then ran to the cutting machine, a distance of about 80 feet, and found Prince pinned between the right rear end of the machine and the coal rib along the right side of the entry, and the left Caterpillar track of the truck spinning. The right track of the truck had stopped. Wolfe tried to shut off the control for the left Caterpillar track, but because of Prince's body could not do so. He cut the power off by disconnecting the trailing cable. He went for help, which arrived quickly. With the assistance of other workmen, using a shuttle car to pull the machine away from the rib, Prince was removed. Prince was then placed on a stretcher, taken to the surface in a mine car, and transported by ambulance to a hospital at Springfield, Illinois. Prince received severe bruises on the chest, abdomen, and back from the upper part of the chest and back to the middle of the thighs, but had no broken bones.

Dante P. Bravin, an electrician employed by the Lumaghi Coal Co. Mine No. 4, located at Collinsville, Madison County, was killed in a motor accident about 5:30 A. M., Saturday, November 3, 1956.

Bravin was 54 years old and had worked for this company just four weeks, starting October 4, 1956. He leaves a wife and daughter as dependents. He formerly worked for the Superior Coal Co. at Gillespie, where he received his Miner's Certificate in 1922.

The accident occurred about midway in the second cross-over between the 3 and 4 east main haulage roads.

Bravin and eight other men were riding out from the working sections to the slope bottom on two locomotives coupled to a tool car. The second locomotive and the tool car were being pulled by the front locomotive. They were coming through a cross-over slowly about 500 feet from the bottom. About half way through, Bravin fell backwards off the seat between the motors. Leonhardt yelled "Stop!", and the motors were stopped as soon as possible by Jones, after traveling about six feet. They then found Bravin crushed under the second motor. The eight men used lifting jacks to raise the motor off of Bravin, placed him on a stretcher, and arrived on the surface with his body at about 6:00 A. M.

Mr. Alfred Joseph Utar, married, two dependent children, was killed at the Peabody Coal Company's No. 10 mine at Pawnee, Christian County, November 15, 1956, at 1:30 P. M., by a fall of clod.

Utar was 42 years old and had been employed at the mine four years. He was regularly employed as an Airdox pipe man, but he was staggering the helper on the loading machine. The accident happened in "C" entry, 12 south 2 west, main south at about 1:30 P. M. He was pronounced dead upon arrival at the St. Vincent Memorial Hospital at Taylorville, Illinois.

---

On November 19, 1956, at 9:15 A. M., Mr. Lee M. Tyree, age 59, married, was killed at the Sahara Coal Company's No. 16 mine, at Harrisburg, Saline County, where he was employed at a buggy operator. He had 15 years of experience at this mine.

The deceased was one of three men working in a gang unit driving entries through a faulty area. They loaded out the 3 south west entry and had some overhang top coal and bad top at the face. The three men stopped to discuss what they would do. After the discussion, they decided to load out what loose coal was left and then move the Joy out so they could drill and shoot the top coal and bad top. After loading the loose coal by making four sets or moves, the Joy operator signalled the buggy driver out. The buggy traveled about the length of itself and stopped. As the operator and helper saw the buggy stopped, they went to see what was wrong. When they got to the front of the buggy, it moved back about two feet. When they got around to the driver's side, the helper saw the buggy driver fall off of the seat on to the ground. His face was up and his head toward the face of the entry and was bleeding. The operator went to call for help. No one saw what happened, whether the deceased was caught between the buggy and rib or between the buggy and roof.

Mr. Claud Cutrell, age 31, married, three dependent children, was killed at the Blue Bird Coal Company's Mine No. 8, near Crab Orchard, Williamson County, on November 26, 1956. He was employed as a loading machine helper. He had three years of experience at this mine.

The deceased, Claud Cutrell, was working in the 6th N. E. The loading machine had finished loading in room 6. The machine was then being moved to room 4 by way of the second cross cut from the face. When the machine got through the cross cut and in about 60 feet from the face in room 4, the operator of the loading machine heard his buddy call, "Look out!" The roof gave way. The operator ran to the cross cut to right in room 4 and got in the clear. The drillers on the opposite side of room 4 heard the deceased call, "Look out!" and then saw him being covered up, the fall killing him instantly.

---

Mr. Steve Buffo, age 49, married, two dependent children, was fatally injured at the Cantine No. 4 mine, Lumaghi Coal Company, at Collinsville, Madison County, about 6:30 P. M., December 10, 1956. He had worked at this mine six years.

Mr. Eugene Cattain, who was the helper on this loading machine, was operating the machine at the time of the accident. Mr. Steve Buffo, the loading machine operator, was at the rear of the loading machine, standing near the rib at the mouth of the cross cut.

When the shuttle car became loaded, Steve Buffo ordered the shuttle car operator to proceed with his load. The shuttle car operator, Mr. Bert Basola, immediately began transporting his loaded shuttle car, and turned into the second left. The rear end of the shuttle car, in making the turn, swung over to the rib where Mr. Buffo was standing, squeezing him between the shuttle car and the rib.

The shuttle car operator stated that he had moved the shuttle car only 3 or 4 feet, when he heard the deceased call out. He stopped the shuttle car immediately.

The cross cut in which the accident occurred was found to be 12 feet 8 inches wide, with no props or debris in close proximity, which could contribute to the cause of the accident. It is the consensus of opinion by the investigators and Mr. Cattain that the deceased, for some reason or other, decided to take his position at this point until the shuttle car had passed. As the shuttle car turned into the cross cut, the rear of the shuttle car travelled within a few inches of the rib where Mr. Steve Buffo, the deceased, was standing. This did not provide sufficient clearance, thereby causing the injury that resulted in the fatality.

Mr. Buffo died at 9:30 P. M., December 24, 1956, in St. Mary's Hospital in East St. Louis.

## ANALYTICAL LABORATORY

The Analytical Laboratory of the Department of Mines and Minerals is located at 413 East Main Street, West Frankfort, Illinois. The Laboratory was established in January of 1948, and temporarily located on the University of Illinois campus. In June 1952 the Laboratory was moved to more permanent quarters in Springfield, Illinois, where it remained until destroyed by fire December 10, 1953.

In May 1954 the Laboratory was moved to West Frankfort, Illinois. The establishment of the Laboratory at West Frankfort, Illinois, was a geographical move which enabled the Laboratory to give quicker service to State Mine Inspectors and Mine Operators. The West Frankfort area is the center of the largest coal producing field in the State of Illinois.

In establishing the Laboratory in January 1948, Illinois became the first State to operate a Laboratory of this type, in connection with its mining department. At the time of the establishment, a study of the Federal Bureau of Mines Laboratory was made and the Department Laboratory adopted methods of analyses and equipment similar to that used by the Federal Bureau of Mines. The Laboratory now has the very latest of modern laboratory equipment.

The purpose of the Laboratory is to analyze for explosive, noxious, and gaseous mixtures in the mining industry. The Laboratory also analyzes mine dust for the determination of the percentages of combustible and incombustible material; thus, aiding the mining industry in the control of flame propagating characteristics of mine dust. Samples of gaseous mixtures may be analyzed and the results reported to the State Mine Inspector within one hour after the samples have been delivered to the Laboratory. In time of emergency, such as mine fires or the sealing of fire areas, the resulting analyses aid inspectors and management in determining procedure to be followed in eliminating the emergency.

During the year 1956 there were 2,750 mine atmosphere samples analyzed and 4,161 coal dust samples were analyzed. Of those analyzed, only 7.1 per cent of mine atmosphere, and 6.0 per cent of mine dust samples did not meet the analyses specified by the Illinois Coal Mining Law.

The Laboratory personnel consists of ten employees:

George W. Sneddon, Supervisor, 317 North Gardner, West Frankfort, Ill.  
John N. Mitchell, Lab. Technician II, Route 2, West Frankfort, Ill.  
Ralph Conover, Lab. Technician II, Route 2, Thompsonville, Ill.  
Earl Brookshire, Lab. Technician II, 222 Dobson St., Carterville, Ill.  
Zudora Hadfield, Lab. Technician II, 603 Future Dr., Marion, Ill.  
Eulah Rogers, Clerk-Steno II, 803 E. Browning, Marion, Ill.  
Mary Jo Yesinkus, Clerk-Typist I, 1109 E. Lindell, West Frankfort, Ill.  
Elsworth Shepherd, Lab. Helper, Route 2, Thompsonville, Ill.  
Arno Stiritz, Lab. Helper, 410 W. Tenth, Johnston City, Ill.  
Fred Mitchell, Lab. Helper, Route 2, West Frankfort, Ill.

## MINE RESCUE STATION ACTIVITIES

1956

On January 23, 1956, the Benton No. 1 and Benton No. 2 Mine Rescue teams were called to Freman Coal Mining Corporation No. 4 mine, located at Marion, to put out an underground belt fire. They were at the mine for 5 hours.

On February 9, 1956, the Benton No. 1, Benton No. 2, and Eldorado Mine Rescue teams were called to the Blue Bird Coal Company mine No. 8, at Harrisburg, to put out an underground belt fire. The two Benton teams were called at 8:30 P. M., and the Eldorado team was called at 9:30 P. M. The teams were at the mine for about 5 hours.

On May 24, 1956, the two Benton Mine Rescue teams were called to the Freman Coal Corporation Orient No. 3 mine at Waltonville, to put out a spontaneous combustion underground mine fire. The teams were called at 8:30 P. M. The No. 1 team did not go below, and both teams arrived back at the Mine Rescue Station at 5:00 A. M. May 25th.

## DIVISION OF OIL AND GAS

The Division of Oil and Gas of the Department of Mines and Minerals is required to enforce the provisions of "An Act in Relation to Oil, Gas, Coal and Other Surface and Underground Resources," and the Rules and Regulations formulated pursuant to the provisions of the Act.

It is the duty of the Division to see that oil wells are properly spaced; to control the drilling and plugging of oil wells and wells drilled in connection therewith; to see that necessary precautions are observed to protect the workable coal seams through which wells are drilled and to prevent pollution of land and fresh water supplies resulting from oil field operations.

Permits must be obtained from the Division of Oil and Gas before wells are drilled for oil, gas, water supply, water input, gas input, air input, salt water disposal, and structure test. In 1956, 6,027 such permits were issued. The Law requires that for each well drilled or acquired, the operator must furnish the Division with bond coverage to guarantee the eventual plugging of the well and the satisfactory restoration of the well site. The State oil well inspectors are in attendance to supervise the plugging of all abandoned drill holes, which in 1956, numbered 2,918.

The Division furnishes copies of permits and plugging affidavits to the State Geological Survey, and is charged with the responsibility of seeing that well logs and cuttings are sent to the Survey. The Division also receives and records completion data on wells drilled.

The Rules and Regulations of the Division provide for the calling of public hearings, upon written request of any interested person, for the purpose of taking action with regard to any matter within the jurisdiction of the Department. All such hearings are made of record in the Division and are open to public inspection.

The Oil and Gas Board consists of four members and the Director of the Department, and is subject to call by the Mining Board for advice and consultation on matters pertaining to the oil and gas industry.
